FROM 21 TO
50

MEDIUM

From 21-50 Grower Organizations

FROM 51 TO
100

LARGE

From 51-100 Grower Organizations

Whether you're a government agency, private cooperation, input provider or trusted advisor; the need to gather data from multiple grower organizations is necessary for efficient operations. **CultivateAI's Enterprise Portal** software solution enables real-time data sharing from connected growers enrolled in your enterprise.

Once data is shared, it will be displayed on your connected data dashboard. The data can then be viewed in graph, report, table or map form, based on your needs.

WHAT THE GROWER GETS to manage their Ag operation:

AGASSESSOR

Safe and secure operational and asset data collection, storage and sharing with trusted enterprise

CAI Scouting App

Mobile application with custom templates to document events in-field

WHAT THE ENTERPRISE GETS to manage their accounts and view shared data:

ENTERPRISE PORTAL

- Safe and secure electronic collection of grower organization data
- Enterprise selects data enrolled in sharing
- Configure data summaries and reports to meet your needs
- Aggregated view of growers data (by region, by state, by seed/product)
- Add a Company Logo that will display to users on web and mobile.
