

MOBILE APP

DIGITAL PROPERTY MAP

PERSONALIZED GIS (GEOGRAPHIC INFORMATION SYSTEM) APP

Give your guests the confidence of knowing where they are, and what they're looking for on your property, with the CultivateAI Digital Property Map App. This mobile application allows guests to see your private roads, landmarks, attractions, boundary lines and their location within your property, on their mobile phone; even without cell service.

Whether you're in the hunting, agritourism, events or experience industry, we can create a customized map app that will surface important information, all in one place; allowing your guests to make safe, informed and efficient decisions on how to navigate your property.

To create your digital property map app, we will first have a discovery session with you to capture your needs and review existing paper maps. Then, we'll use the latest satellite imagery to digitize your property's unique features. Looking for a higher resolution map? Allow us to utilize our large assortment of drones to capture higher quality images.

FEATURES

- My Location
- Homepage
- Header / Footer
- Online
- Privacy Login (Optional)
- Unlimited Users
- Satellite Imagery
- Private Roads & Boundaries
